

### Description

NEC 100.25 compliant lockout/tagout mechanism. 1-pole, 2-pole and 3-pole configurations affix permanently to E-T-A's 4230-T MCB and has provisions for six 1/4 inch locks.

### Typical Applications

All applications requiring a lockout/tagout (LOTO) provision to protect users from unexpected energization, startup or release of hazardous energy while performing service and/or maintenance on machinery or equipment.
